## SUMMARY

Fullstack developer with 1+ year of professional experience. Shipped a marketplace to 13,000+ users on GCP Cloud Run, built FastAPI/PostgreSQL backends, and cut infrastructure spend 46% on a legacy system.

## EXPERIENCE

### Fullstack Developer | Third Eye Creative

Dec 2025 – Present

- Launched Passiton, a recycling marketplace serving 13,000+ users on GCP Cloud Run.
- Cut Vertex AI API failure rate from 33% to 3% by implementing retry logic in the marketplace backend.
- Reduced feed load time from 10s to under 2s with a Redis-cached feed algorithm, and eliminated third-party mapping API costs by integrating OpenStreetMap.
- Shrank the production PostgreSQL database 60% (2GB to 800MB) and sped up complex join queries 40% through a zero-downtime cleanup of problematic ("poison pill") rows and targeted indexing.
- Reduced infrastructure spend 46% for a legacy cash-collection tool by migrating from AWS EC2 to DigitalOcean and containerizing the stack with Docker.
- Cut build-to-delivery time for 3 Play Store apps from hours to minutes by building a multi-tenant CI/CD pipeline with GitHub Actions and Docker Hub.
- Built the backend for bluedot.ngo, an NGO donation-management portal, as a FastAPI REST API on PostgreSQL (Supabase) with SQLAlchemy/Alembic migrations, JWT authentication, and rate limiting.
- Secured the NDB government portal for launch by implementing role-based access control (RBAC) and data masking.

### Fullstack Developer Intern | EarthlyExotica

Jan 2025 – May 2025

- Built the mobile-responsive Flutter frontend for baadige.com using reusable, modular components to speed up UI development.
- Integrated core REST APIs to connect the Flutter app to platform features.

## SKILLS

**Languages:** Python, JavaScript, TypeScript, Dart, Java, SQL, HTML, CSS

**Backend & APIs:** FastAPI, SQLAlchemy, Alembic, Pydantic, REST APIs, JWT authentication, RBAC

**Frontend & Mobile:** Flutter

**Cloud & DevOps:** GCP (Cloud Run, Vertex AI, IAM), AWS (EC2), DigitalOcean, Docker, GitHub Actions, Jenkins, Linux, Vercel

**Databases:** PostgreSQL (PostGIS), Redis, Supabase, MySQL, MongoDB, Firebase

**Tools:** Git, Postman, Android Studio

**Concepts:** Data Structures & Algorithms, Object-Oriented Programming, CI/CD, Database Migrations

## PROJECTS

### Smart Attendance System | Python, OpenCV, NumPy | [link](#)

- Built a real-time facial recognition pipeline on CCTV feeds that replaced manual logging with automated CSV attendance tracking.

### Weather Alert & SMS Notification System | Python, OpenWeatherMap API, Twilio API | [link](#)

- Built an automated service that broadcasts localized rainfall alerts by SMS from real-time weather data.

### Real-Time Sign Language Translation System | Python, ML |

- Improved gesture-recognition accuracy by building a data-augmentation and cleaning pipeline for sign-to-text translation.

## EDUCATION

### B.E. in Computer Science & Engineering | VTU

Dec 2021 – June 2025 | CGPA: 7.95/10

## CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional [link](#)
- Oracle OCI AI Foundations Associate [link](#)
- Java OOP [link](#)
